3 Horizons

Reflection

How do we fit in?

Democratic Leader

- **Precise:** Provides stakeholders with precise and clear updates on project progress.
- **Questioning:** Involves asking deep, insightful questions during user interviews and surveys to uncover the real needs, preferences, and pain points of stakeholders.

Democratic Leader

- **Caring:** Shows genuine concern for the well-being of team members and stakeholders, creating strong trust bonds
- **Sharing:** Promotes knowledge sharing and collaboration within the team and stakeholders.

Authoritative Leader

- **Caring:** Shows genuine concern for the needs and interests of stakeholders
- **Patience:** Demonstrates patience when explaining complex project details to stakeholders, ensuring they understand the implications and benefits of the project.

UX Designer

Project Manager

Stakeholder Analyst

Data Reporting Analyst

Democratic Leader

- **Sociable:** Builds strong relationships with other team members, stakeholders, and community members to gather accurate and comprehensive data. This quality helps in gaining trust and encourages open sharing of information.
- **Persuasive:** Uses data to build strong, evidence-based arguments that can influence project decisions and convince stakeholders of the need for certain actions or changes.

What are we lacking?

Democratic Leader

- **Precise:** Provides stakeholders with precise and clear updates on project progress.
- **Questioning:** Involves asking deep, insightful questions during user interviews and surveys to uncover the real needs, preferences, and pain points of stakeholders.

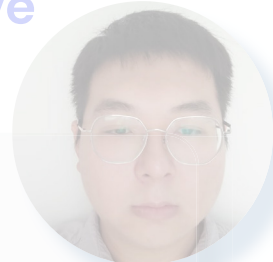

Democratic Leader

- **Caring:** Shows genuine concern for the well-being of team members and stakeholders, creating strong trust bonds
- **Sharing:** Promotes knowledge sharing and collaboration within the team and stakeholders.

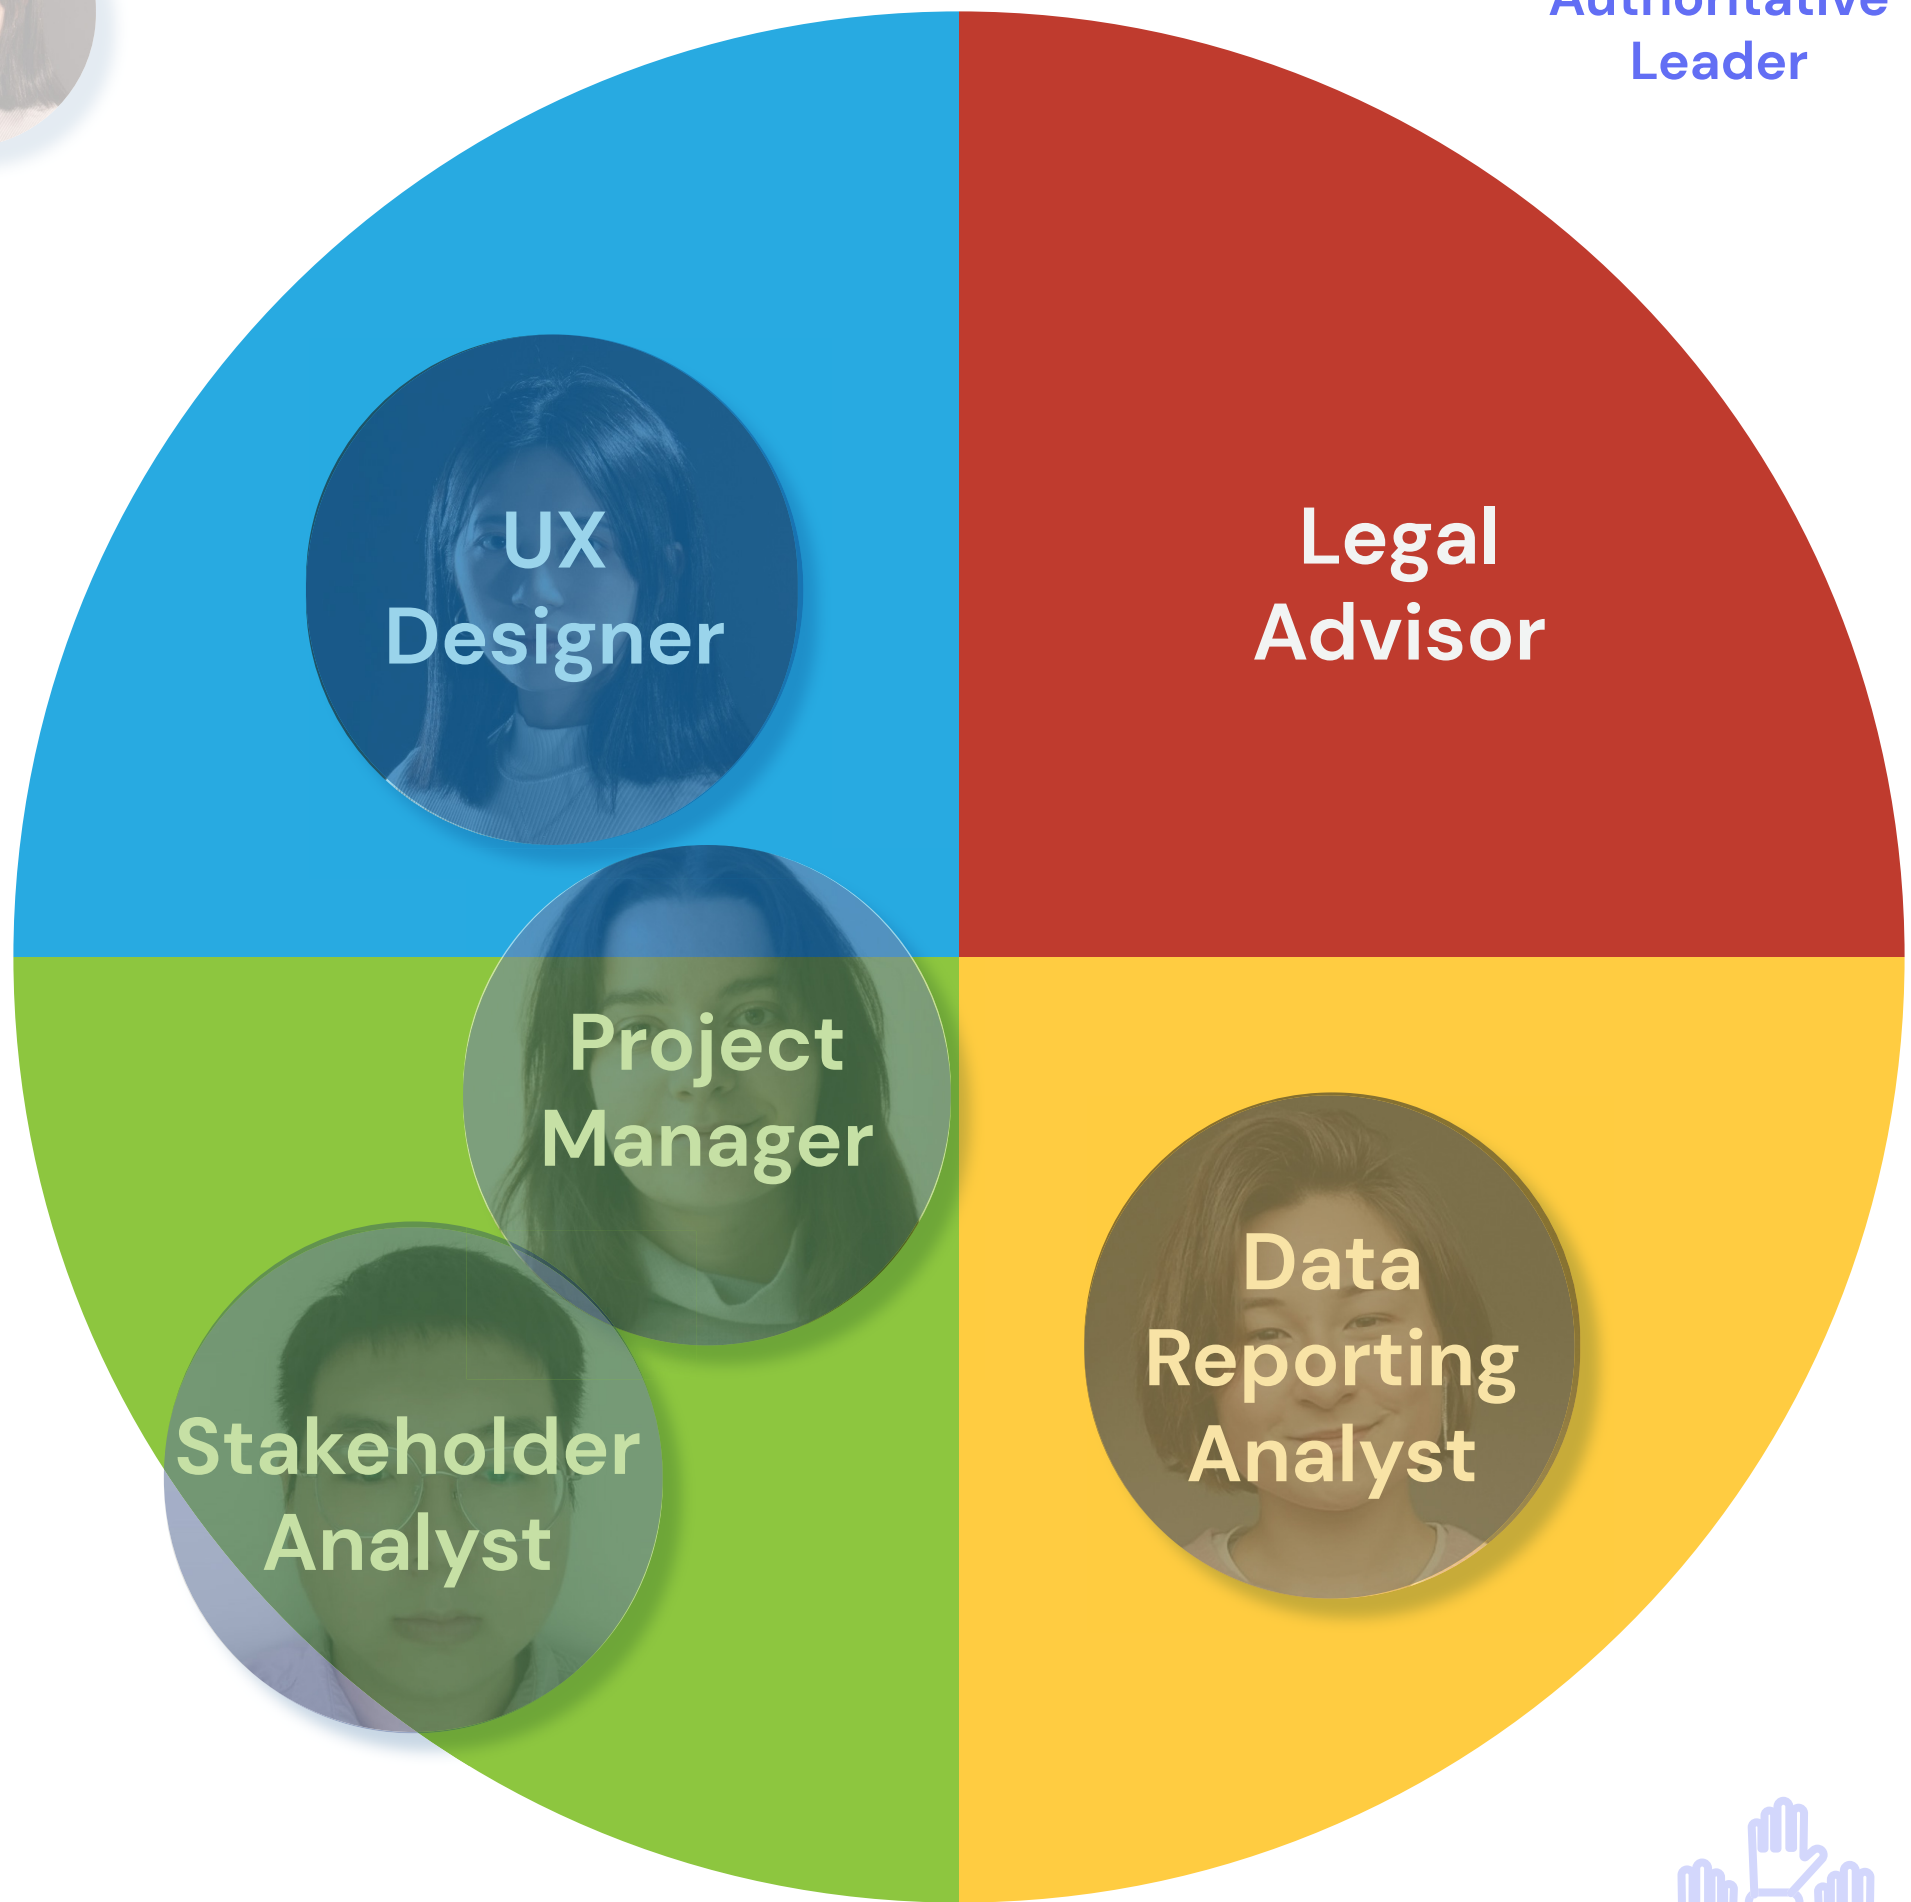

Authoritative Leader

- **Caring:** Shows genuine concern for the needs and interests of stakeholders
- **Patience:** Demonstrates patience when explaining complex project details to stakeholders, ensuring they understand the implications and benefits of the project.

Authoritative Leader

- **Determined:** Ensures that all aspects of the project comply with relevant laws and regulations. This determination helps in meticulously reviewing legal requirements and staying updated with any changes in the legal landscape.
- **Strong-Willed:** Ensures that these policies are implemented and enforced consistently, standing firm against any deviations.

Democratic Leader

- **Sociable:** Builds strong relationships with other team members, stakeholders, and community members to gather accurate and comprehensive data. This quality helps in gaining trust and encourages open sharing of information.
- **Persuasive:** Uses data to build strong, evidence-based arguments that can influence project decisions and convince stakeholders of the need for certain actions or changes.

GREEN

100% Free Personality Test - Discover Yourself

I just found out I am an GREEN . What personality type do you think you...

my-personality-test.com

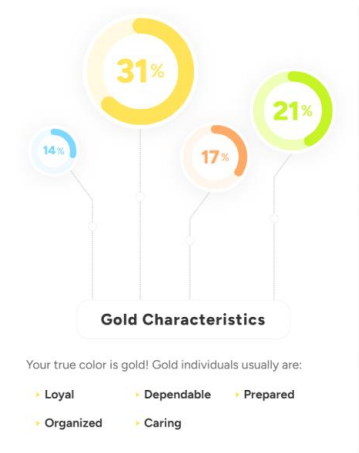

Your true color is gold!

You are very detail-oriented and love to plan ahead. You are very predictable and responsible, which gives you a sense of security in life. You rarely do anything that is unpredictable or unplanned.

You also value history and tradition. You hold your family's shared beliefs very closely, and have a high moral standard. You enjoy finding ways to live out these values in various ways throughout your life, whether that be through helping others by volunteering or through your career. You enjoy having others rely on you to help.

You enjoy being the best at what you do, and believe there is a right way to do everything. Others would describe you as a "rule-follower" who "does things by the book". Because of this, you can also become pushy and judgmental when you don't agree with others' decisions.

Because of their need for structure, security, and predictability, those whose true color is gold do well in jobs that are very straightforward and have highly defined duties. You enjoy knowing what your tasks will be for the day, and would not perform well in careers that are highly unpredictable. Gold individuals are well-suited for careers in finance or public service.

Your true color is green!

Others often describe you as extremely intelligent. You have an innate desire to do things to the best of your ability, and take pride in your work. You set the standard for everyone else at work. To you, work is truly enjoyable. Even on the weekends, you can't stand the thought of wasting a day by doing nothing, and always try to fit as much into each day as possible.

You are also a big thinker. You enjoy talking with others about abstract, philosophical ideas. You enjoy thinking about the future and all of its possibilities. You believe that you should never stop learning, and enjoy learning new information simply for your own enjoyment. In the workplace, you are a creative "idea person" who comes up with creative and practical solutions to problems.

You are very independent. Although you enjoy spending time with others, you need your private time each day to recharge. This gives you time to process everything. Individuals with green personalities do well in careers that allow them to apply all of the "big ideas" they have. They typically succeed in careers within higher education, science, technology development, and medicine.

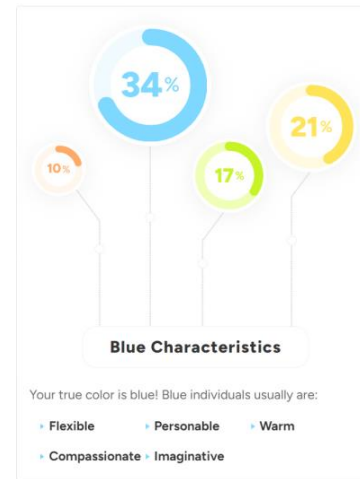

Your true color is blue!

You are typically calm, optimistic, and kind. You are a genuinely caring and compassionate individual who tries to see the best in others and in every situation. In stressful situations, you are able to remain calm and mediate situations between individuals.

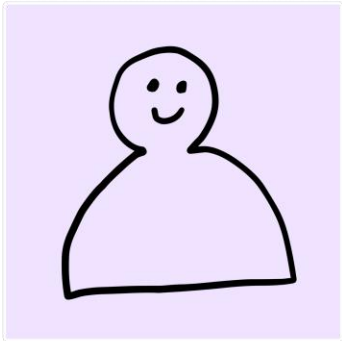

Your personality gives you a deep desire to feel appreciated and loved by others. In your family life, you are always giving words of affirmation, and expect the same in return.

Your positive attitude motivates others. You are not a leader who is the loudest or most charismatic, but rather, you are a quiet leader who inspires others through your own hard work and kindness toward others. You truly lead by example.

Those whose true color is blue do well in caring occupations that allow them to make a difference in the lives of others. They often are most successful as faith leaders, counselors, medical professionals, or educators.

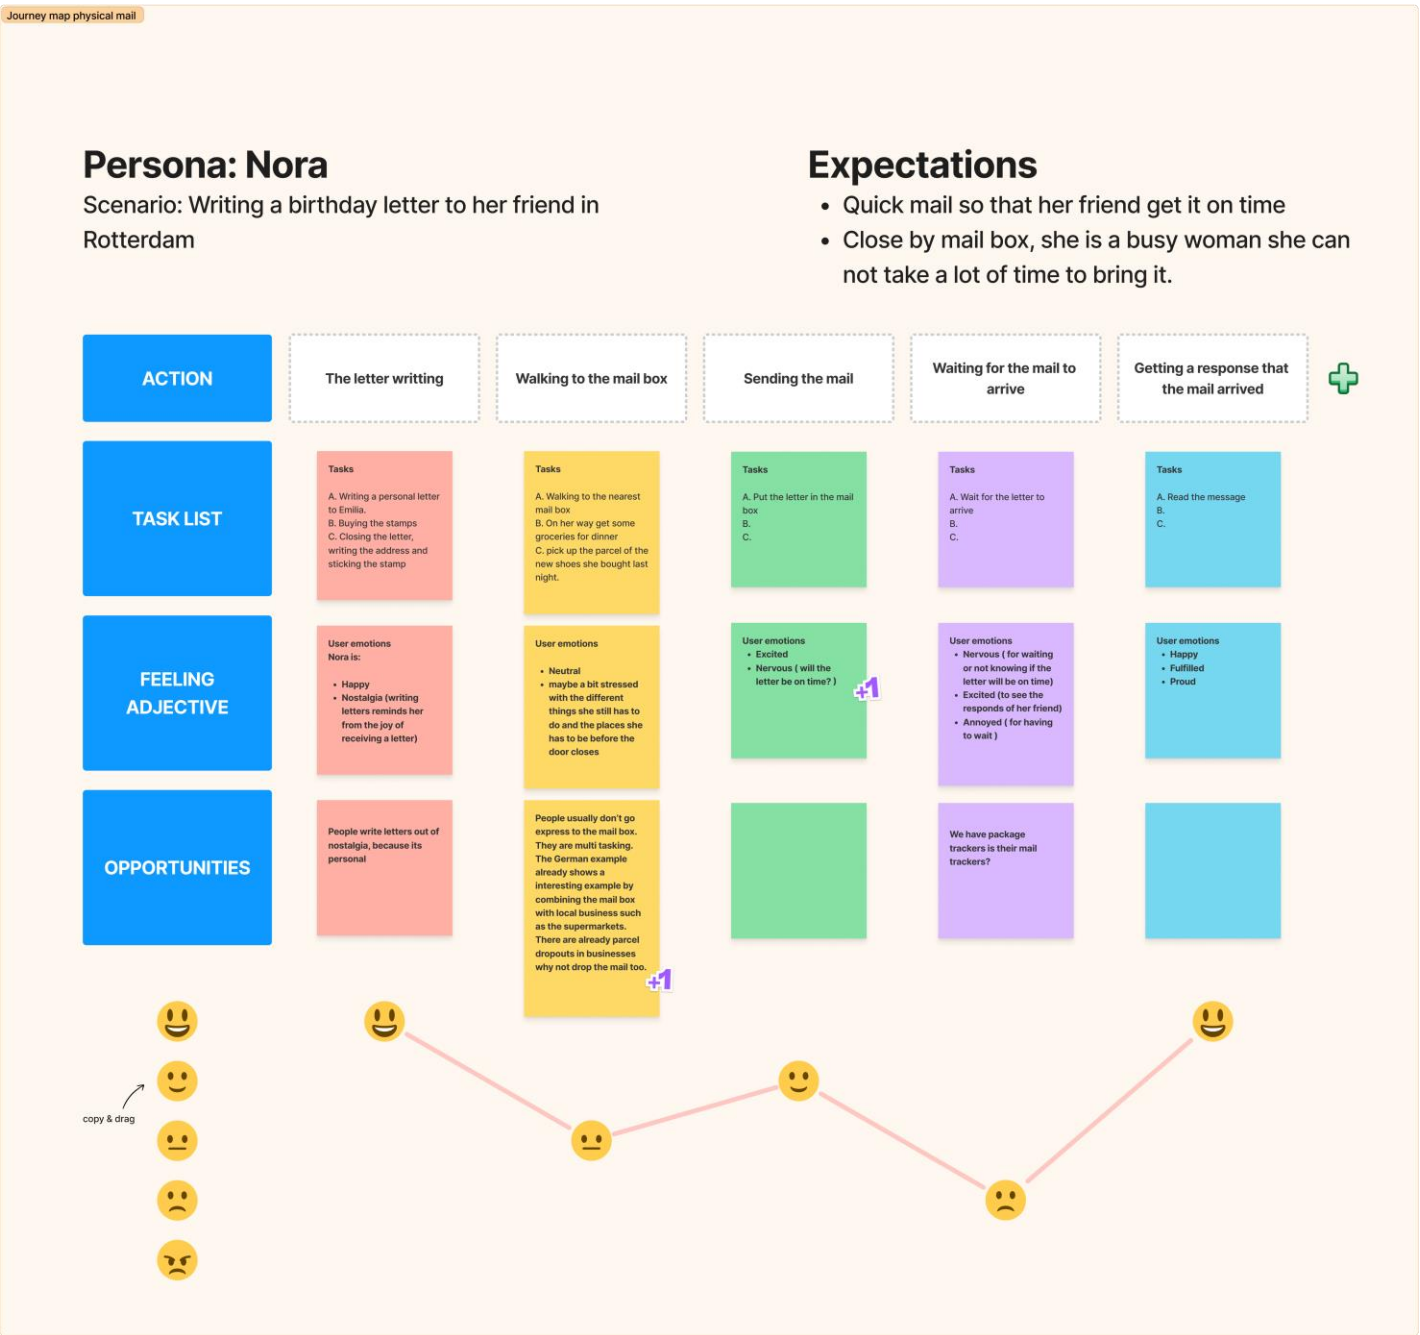

Persona & Journey Map

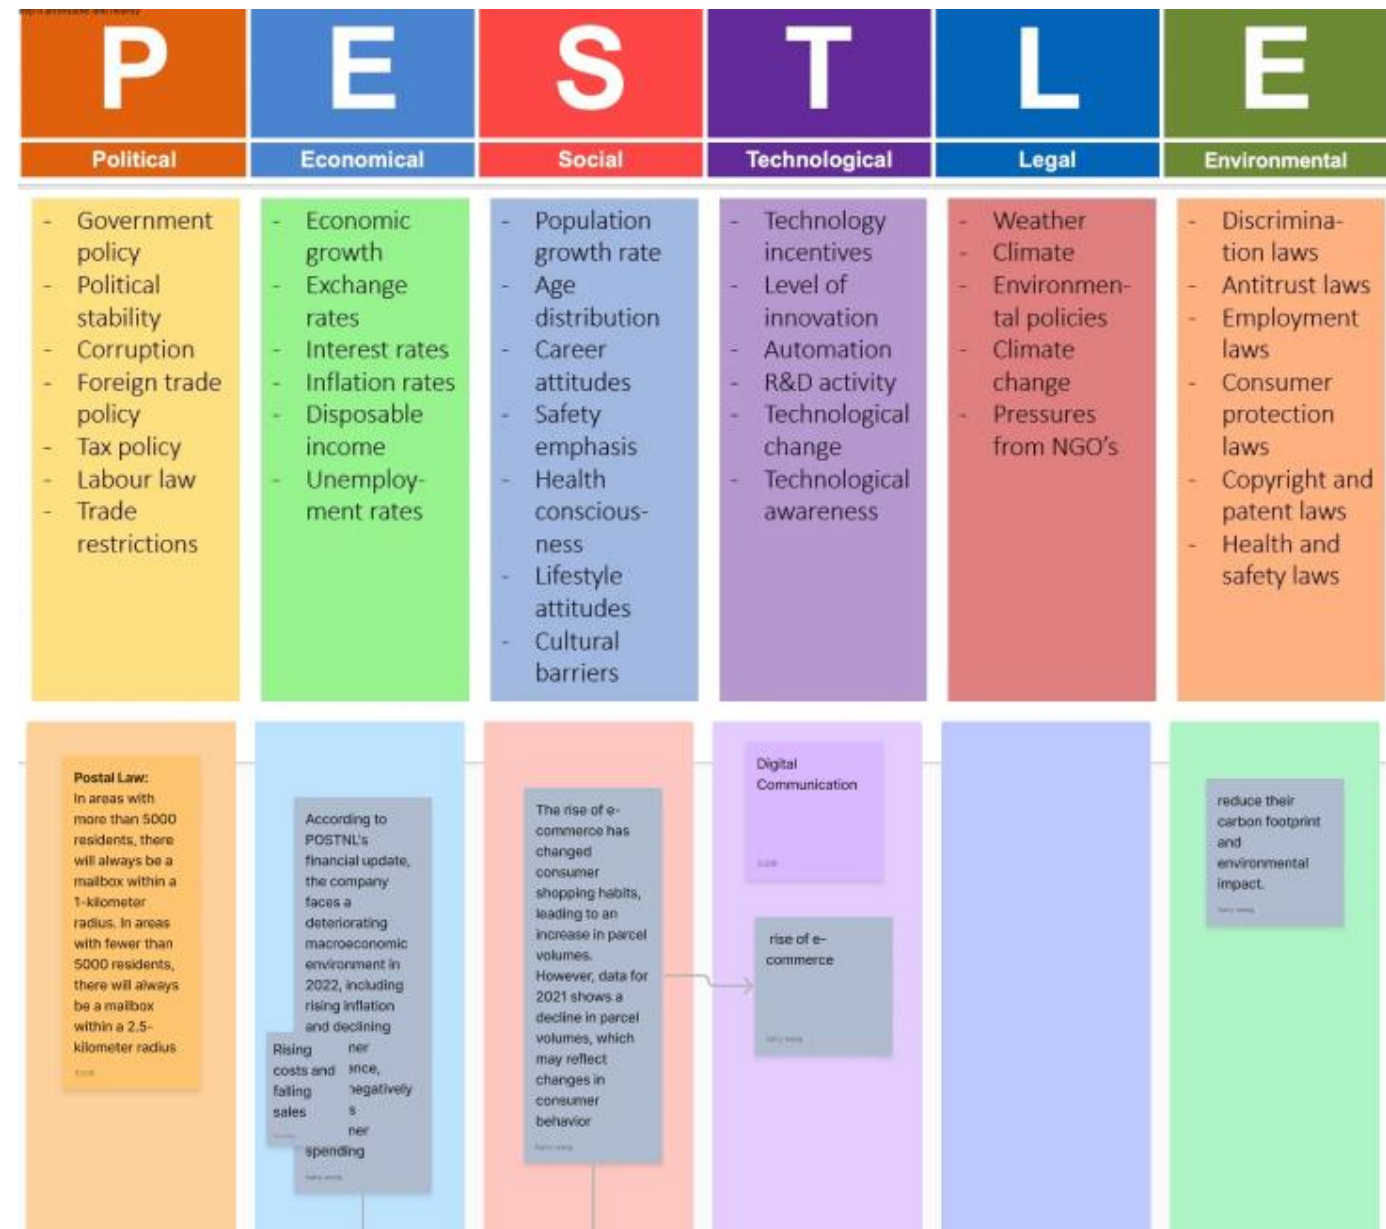

Theresa

"Birthdaycard senders between 35-45 (women)"

- Name: Theresa Jansen
Age: 70
Location: Eindhoven, Netherlands
Occupation: Retired
Family:
- Children, Martha (35) Peter(40)
 - grandchildren, Maria (4)
- Interests:
- Fashion and trends
 - Reading books
 - Personalizing and crafting thoughtful gifts
 - Community events and local markets
- Personality:
- Warm and personable
 - Creative and detail-oriented
 - Nostalgic
- Goals and Motivations:
- Personal: To maintain a close-knit family and instill her love for reading and creativity in her children.
 - Community: To support local artisans and businesses, fostering a sense of community in Eindhoven.
- Nora's Approach to Birthday Cards:
- Nora values the personal touch in communication, especially in the digital era where emails and text messages dominate. She believes in the charm of a handwritten note, which shows thoughtfulness and care.

WHY

Helena Mossel

Bigger picture:

The digitization of communication is reducing physical mail volumes, impacting the cost-effectiveness of PostNL's services.

Information taken from :
THE REPORT FROM THE COMMISSION TO
THE EUROPEAN PARLIAMENT AND THE
COUNCIL
on the application of the Postal Services
Directive

The Importance of Postal Services

The EU postal services (letter mail and parcels) sector is a **key enabler of the economy and of trade**, underpinning other sectors and contributing to the **growth and resilience of the EU economy**. Companies of all sizes use postal services to **build their business**, supply goods and receive payments. All levels of government and public administrations rely on postal services for public communications. Vulnerable users and citizens in rural remote areas need postal services to remain connected to an **increasingly digitalised economy**. The postal services sector hence plays an **essential role** in ensuring the right to communication and in promoting territorial, social and economic cohesion.

Digitization:

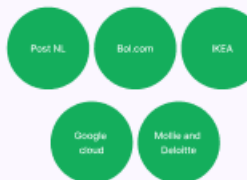

Digitalization and technological developments have transformed consumer and business needs, leading to the creation of new products, services and business models. The postal sector is no exception. Since the financial crisis in 2008, there has been a steep decline in letter mail as electronic substitution of traditional mail services is accelerating when governments, businesses and consumers increasingly adopt electronic processes across multiple domains. During the COVID-19 pandemic, five major EU universal service providers 5 have reported a drop in letter mail volumes, ranging from **-10 percent in the Netherlands** to **-18 percent in France**

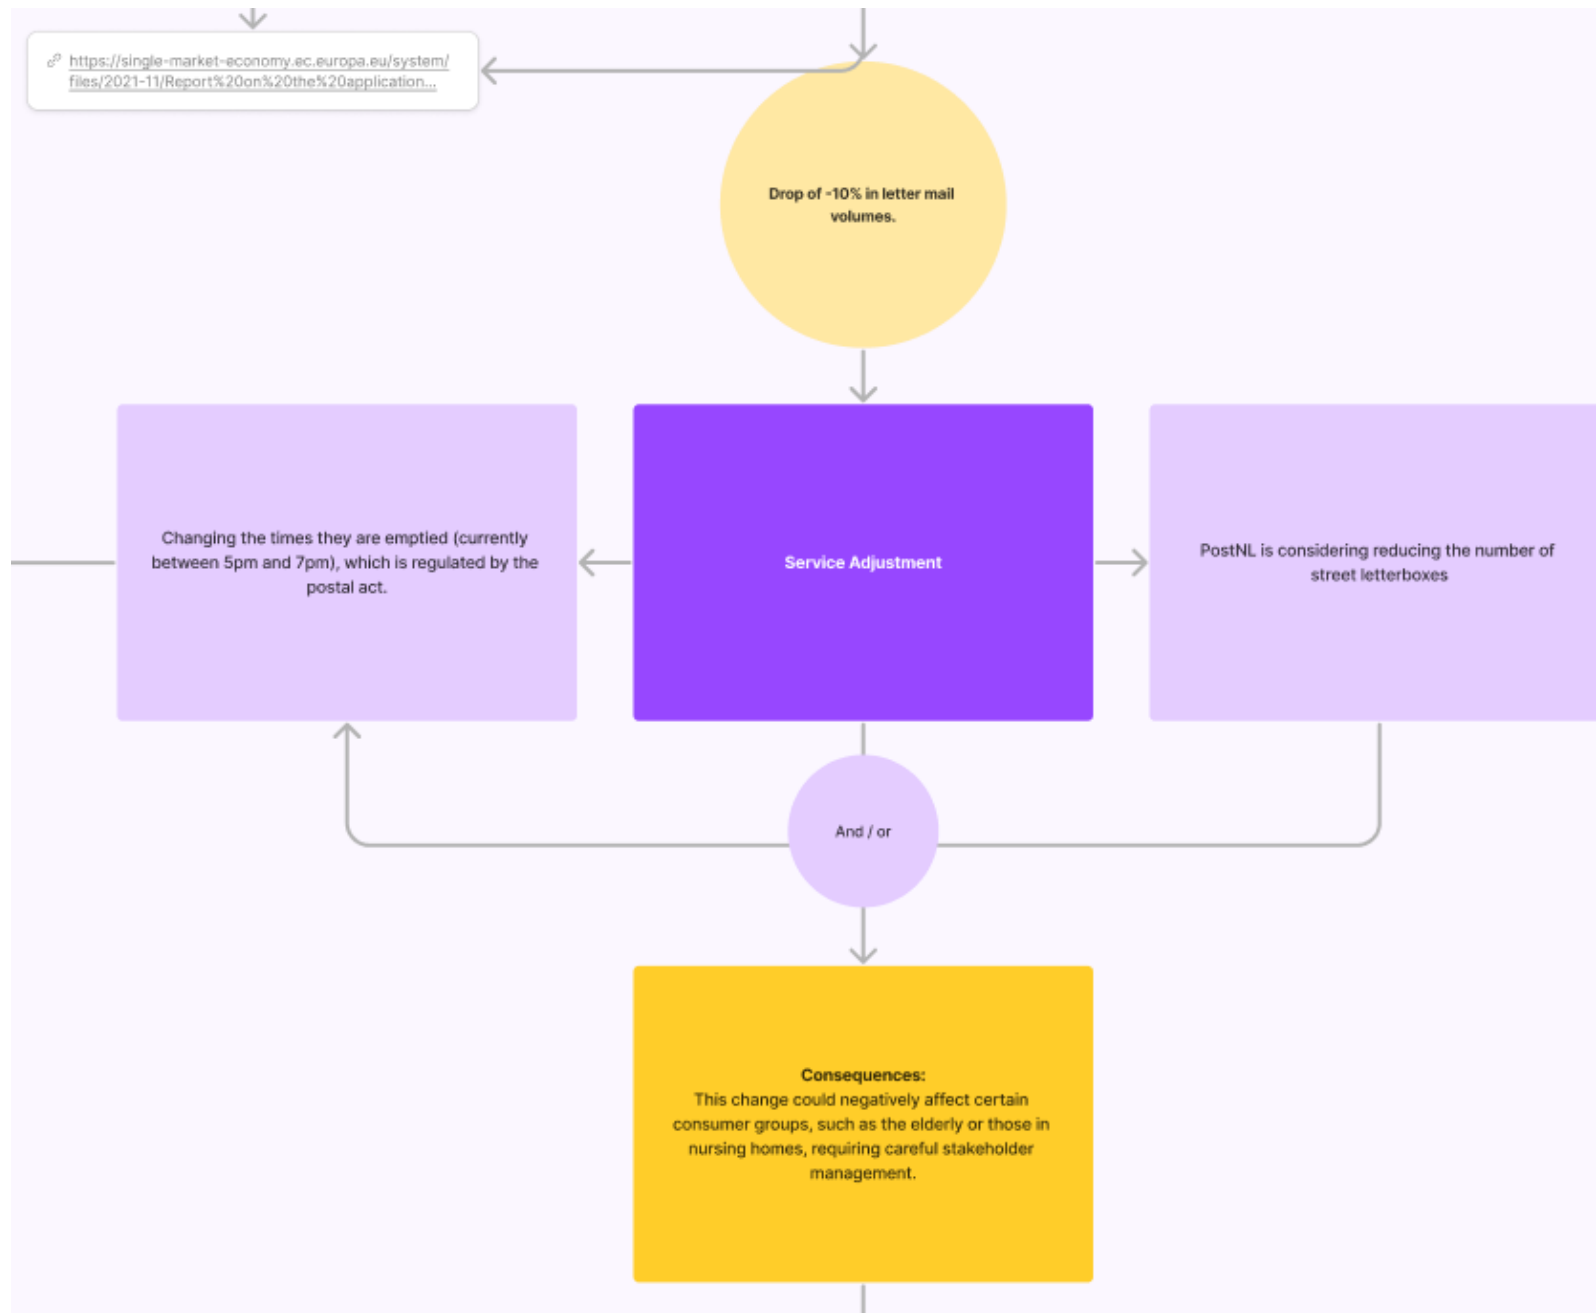

But what are the other possibilities due to Digitization?

Econnections innovation programme

PostNL has joined forces with bol.com, IKEA Netherlands, Google Cloud, Mollie and Deloitte to launch the Econnections programme. They are working in tandem with young, innovative companies on solutions to accelerate sustainability across the e-commerce chain.

Policy restrictions to take in account

Requirements of the Universal Postal Service

On 1 January 2016, the amendments to the Dutch Postal Act 2009 and the Postal Decree 2009 came into effect. The Decree is an underlying regulation that elaborates on specific subjects in accordance with the Postal Act 2009.

- In residential areas with more than 5,000 inhabitants, a post box for public use has to be available within a range of 1,000 meters. Outside residential areas with more than 5,000 inhabitants, a post box has to be available within a range of 2,500 meters.
- At least 95 percent of Dutch residents must have a retail location available that includes our full range of services within a five kilometer distance. For citizens living outside residential areas with more than 5,000 inhabitants, at least 85 percent must have such a retail location available.
- We are required by law to let community organisations have a say in planned changes to the retail network.

The Dutch Postal Act 2009 requires PostNL as the USO provider to provide nationwide services and to perform a daily delivery round from Tuesday till Saturday, except on public holidays. There is also a requirement to deliver urgent medical items and funeral notifications on Mondays. **At least 95 percent of all standard single rated domestic letters under the USO posted the day before must be delivered in 24 hours.** Furthermore, PostNL is required to maintain a network of letterboxes and post offices for access by the general public. The Postal Regulation 2009 covers detailed tariff regulation, cost and revenue accounting, financial administration and reporting.

The Universal Service Obligation
With the Universal Service Obligation (USO), the Dutch government aims to keep sending and receiving mail accessible to all citizens. By separate decree PostNL is the designated provider of the USO in the Netherlands.

PostNL is obligated to provide a service that allows sending and receiving of mail and is accessible to all citizens

Letterboxes

When compared to other European countries, the network of letterboxes in the Netherlands is particularly dense. PostNL reduced the number of letterboxes and transferred letterboxes that are frequently used, based on local market developments and local consumer needs. Those we transferred, were relocated to more regularly visited and busy locations, such as supermarkets, train stations and suburbs. Letterboxes near health institutions, which are part of the independent healthcare comparison website 'Zorgkaart Nederland', were not removed.

Advisory processes

We recognize the importance of the postal service for customers and organize advisory processes with a (local) representatives' panels to give interest groups a voice in the changes that concern them. In 2015, we formed a consultation group that was formed with representatives of interest groups for elderly people, disabled people, inhabitants of rural parts of the country, the Dutch Association of Municipalities (VNG) and the National Institute for Public Health and Environment (RIVM). This initiative resulted in collective consent for the plans we have for our retail network, as well as a protocol for involving (local) interest groups for future changes to post offices and letterboxes. In 2016, PostNL has started consulting (local) interest groups about its relocation policy for post offices and local changes in its network of letterboxes.

How did other countries tackle this issue?

Example: The UK - Royal Mail:

Collection Time

Sometimes our postboxes can change to an **earlier collection time**, and the mail will be collected when a postman or woman is making their deliveries, usually in the morning. We'll put a label on the postbox to let you know before we change it.

I have noticed that my local postbox is now being collected by a postman or woman on their rounds. Why is this happening? A significant decline in letter volumes means that many post boxes no longer cover their costs and contain very few items of mail, meaning collecting from these boxes is not efficient. Rather than decommission uneconomic low-use post boxes, since 2014 we have been improving the efficiency of our collections arrangements by using our Collection on Delivery initiative. This means the mail collection from these postboxes will be carried out by the local postman or woman on their delivery route, at a time dependent on where the box is located on that route. This will typically be between 9am and 3pm in urban and suburban areas on Monday to Friday, and no earlier than 7am on a Saturday. Later timed postboxes are normally located at Post Offices, our Royal Mail offices and associated with Parcel Boxes. These are typically collected from 4pm* on weekdays. Details of these postboxes can be found on our [Services near You](#) tool.

United Kingdom

Royal Mail has reduced the number of mail collections and deliveries in response to the decline in letter volumes and to cut costs. They have focused on enhancing parcel services, given the rise in e-commerce. Communication strategies included:

1. **Public Announcements and Consultations:** Royal Mail used public announcements to inform customers about the changes. They also conducted consultations with affected communities to gather feedback and address concerns.
2. **Customer Service Enhancements:** Providing clear information on their website and through customer service channels about new collection times and locations of remaining post boxes ([Citizens Advice](#)).

Finland (Posti): Posti reduced mail collection frequencies and optimized delivery schedules. They engaged in public consultations and utilized their website and social media channels to keep customers informed. Additionally, they provided detailed FAQs and customer support to help people adjust to the changes ([EU Business](#)).

Germany

Deutsche Post has integrated postal services with other retail locations, reducing the need for standalone post offices. Their communication strategies involved:

1. **Integration with Retail Stores:** Deutsche Post combined postal services with grocery and stationery stores, making it more convenient for customers while reducing operational costs.
2. **Broad Communication Campaigns:** They conducted extensive communication campaigns through various media, explaining the changes and the benefits, such as extended service hours and improved parcel delivery options ([How To Germany](#)).

European Commission's Role

The European Commission has been active in overseeing and guiding these changes across member states. They organize workshops and stakeholder meetings to discuss the impact of declining letter volumes and increasing parcel deliveries. The Commission emphasizes:

1. **Stakeholder Engagement:** Engaging with national regulatory authorities, postal operators, and consumer groups to ensure that any changes are well-communicated and meet the needs of all stakeholders.
2. **Transparency and Feedback:** Maintaining transparency about the reasons for changes and gathering feedback through surveys and public consultations to make informed decisions ([EU Business](#)) ([EU Business](#)).

Aspect	E-boks (Denmark)	Docaposte (France)
Introduction	Launched in 2001 as part of Denmark's e-government strategy; government-backed	Created as La Poste's digital subsidiary; leveraged La Poste's reputation
Initial Audience	Targeted general public for receiving official documents	Targeted businesses and public sector organizations for digital transformation
Promotional Activities	Public awareness campaigns, emphasizing convenience and security	Industry events, partnerships, and marketing campaigns
Transition Strategy	Mandatory use for official communications; incremental service integration	Gradual adoption; consulting services for tailored digital transformation
User Support	Online tutorials, help centers, customer support for smooth transition	Training sessions, phased rollouts, technology integration
Government Role	Strong governmental mandate and support	Supported by La Poste, a public entity, but with a focus on business needs

Introduction:

- Initial Launch: E-boks was launched in 2001 as a digital mailbox service to facilitate secure communication and document management between public authorities, businesses, and citizens.
- Government Initiative: The Danish government played a pivotal role in introducing E-boks. It was part of a broader e-government strategy aimed at digitizing public services to improve efficiency and accessibility.
- Public Awareness Campaigns: Extensive public awareness campaigns were conducted to educate citizens on the benefits of using E-boks, emphasizing convenience, security, and environmental benefits.

Transition:

- Mandated Usage: The transition was significantly driven by the government making it mandatory for citizens to use E-boks for receiving certain official communications, such as tax notices and health records.
- Incremental Integration: Gradually, more public and private sector entities integrated their services with E-boks, increasing its utility for users.
- User Education: Continuous efforts were made to educate users through online tutorials, help centers, and customer support to ensure a smooth transition.

Introduction:

- Formation: Docaposte was created as the digital subsidiary of La Poste, the French postal service, to offer a range of digital transformation services, including secure document management, digital signatures, and archiving.
- Market Entry: It entered the market leveraging La Poste's extensive network and reputation, initially targeting businesses and public sector organizations looking to digitize their processes.
- Promotional Activities: Docaposte promoted its services through industry events, partnerships, and marketing campaigns highlighting the benefits of digital transformation and secure document management.

Transition:

- Gradual Adoption: Transitioning to Docaposte's services was a gradual process for many organizations, involving phases such as pilot projects, training sessions, and phased rollouts.
- Consulting Services: Docaposte offered consulting services to help organizations understand and implement digital solutions effectively, ensuring tailored approaches to their specific needs.
- Technology Integration: Emphasis was placed on integrating Docaposte's solutions with existing systems in organizations, ensuring minimal disruption and maximizing efficiency gains.

Reducing letterboxes for an affordable network

Taking it step by step

We anticipate further downsizing of the postal market. To keep mail affordable, we're making adjustments to the nationwide letterbox network. We won't be doing this all at once, but gradually. We're carefully assessing the existing letterboxes and only removing the ones that aren't needed. For instance, sometimes there are two within a 100-meter radius. We estimate this will affect about 10% of the letterboxes in the Netherlands.

Find the nearest letterbox

Ensuring accessibility

We're paying close attention to the location. Letterboxes near places like hospitals and other healthcare facilities will stay put. Additionally, we're following the rules outlined in the postal law. This means that in areas with more than 5000 residents, there will always be a mailbox within a 1-kilometer radius. In areas with fewer than 5000 residents, there will always be a mailbox within a 2.5-kilometer radius.

Starting in Leeuwarden

Leeuwarden is the first city where we're removing some mailboxes. In Leeuwarden, you can post a letter at 100 locations, with 87 letterboxes on the street in the selected area. Initially, we're removing 8 letterboxes that are very close to other letterboxes.

When will the letterboxes be removed?

The first letterboxes will be removed starting from January. If you're wondering where you can post a letter then, you can find all the PostNL points and letterboxes in Leeuwarden and across the Netherlands with the location finder Always nearby

While some letterboxes are going away, we'll always be close by. We're now installing more and more automated parcel lockers, where you can send both packages and letters. Learn more about automated parcel lockers
